## BUREAU OF THE CENSUS

GEORGE HAY BROWN, Director  
WALTER F. RYAN, Associate Director  
DINO S. VILLA, Deputy Associate Director

The foreign trade statistics program is under the direction of Leonard R. Jackson, Chief, Foreign Trade Division. Technical staff and the areas of their responsibility are indicated below:

Regulations and Program Coordination \_\_\_\_\_  
Joseph H. Freeman, Assistant Division Chief

Trade Practices and Regulations Branch  
Emerson L. Jones, Chief

Program Coordination and Surveys Branch  
Clifton S. Jordan, Chief

Commodity Programs \_\_\_\_\_  
Melvin A. Hendry, Assistant Division Chief

Special Projects  
Harold L. Blyweiss

Food, Animal, and Wood Products Branch  
John R. Anglin, Chief

Textiles Branch  
Ruth C. Myrick, Chief

Minerals and Metals Branch  
Dwight Robeson, Acting Chief

Machinery and Vehicles Branch  
Russell B. Washington, Chief

Chemicals and Sundries Branch  
James A. Dailey, Chief

Program Implementation \_\_\_\_\_  
Irving Weiss, Assistant Division Chief

Special Reports and Foreign Aid Branch  
Charles C. Alexander, Chief

Trade Information Branch  
Paul V. Finn, Chief

Program Plans and Specifications Branch  
Sadie B. Bayne, Chief

Research and Systems \_\_\_\_\_  
Martin M. Weingarten, Assistant Division Chief

Program Research Branch  
Bennie A. Daniels, Chief

Systems Branch  
Bruce Walter, Chief

Transportation Advisor \_\_\_\_\_  
Milton Kaufman

---

Editorial supervision is provided by  
Maureen Padgett of the Administrative  
and Publications Services Division.

# GUIDE TO FOREIGN TRADE STATISTICS: 1971

## Chapter I - Introduction

The foreign trade statistics program, conducted by the Bureau of the Census, involves the compilation and dissemination of a large body of data relating to the imports and exports of the United States. These statistics are designed to serve the needs of both government and nongovernment users who have a wide range of interests. The program, therefore, includes a variety of data presented in many different arrangements and released in the form of reports which are available by subscription and in reports and machine tabulations which are distributed to Department of Commerce field offices and Bureau of Customs offices for public reference use. This publication is intended to serve as a guide to the various sources of foreign trade statistics and to inform users of the content and general arrangement of the data. It should, therefore, assist in the location of particular information and make it possible to utilize the available sources to better advantage.

As indicated, the foreign trade statistics program is designed to meet the needs of a variety of users. Thus, the statistics are put to many different uses to fulfill these needs. In order to assure compatibility between needs and uses, the outputs of the program were developed in consultation with the various types of users both in government and industry.

Government uses the foreign trade statistics in developing the merchandise trade figures in balance of payments accounts; to appraise and analyze major movements and trends (commodity and geographic) in international trade; to evaluate and plan such programs as the export expansion program, agricultural development and assistance programs, and programs under the Foreign Assistance Act and the Merchant Marine Act; to measure the impact of tariff and trade concessions under the GATT, e.g., most recently the so-called Kennedy Round. The foreign trade data are also used extensively as the statistical base to implement and analyze operations under various international agreements, such as the Long Term Cotton Textile Arrangement, the International Coffee Agreement, the U.S.-Canadian Automotive Products Trade Agreement, etc.

Nongovernment users in industry, finance, research institutions, transportation, and other fields, use the foreign trade data to appraise the general trade situation and outlook; in share of the market analyses and market penetration studies; in product and market development; for measuring the impact of competition; and, in general, as one of the statistical bases for determining marketing policies. The transportation industry--in particular vessel and air--makes extensive use of the data not only in market share and penetration analyses but also in the critical area of anticipating the need for and design of future facilities and equipment.

To satisfy this broad range of needs and uses, the outputs of the foreign trade statistics program are presented at various summary and detailed levels. For example, for the general economic and/or financial

analyst and others interested in broad movements and trends in U.S. foreign trade there is a publication entitled Highlights of Exports and Imports (FT 990) which presents monthly and cumulative data interrelated in terms of commodity groupings, geographic areas, and major movements in U.S. foreign trade. Publications such as the FT 410 and FT 135 reports show monthly and cumulative data on exports and imports respectively, in commodity-by-country detail. Other reports present these data in world area and country arrangement as well as by method of transportation for vessel and air. A series of reference tabulations, available to the public, present data in even further detail, showing such items as tariff rate provision, dutiable value and calculated duty for imports; customs district of entry (and unloading) for imports and exportation for exports; type of service (e.g., liner, tanker, irregular) for waterborne trade; U.S. versus foreign flag carriers for vessel and air data, etc. Complete information on all publications and tabulations and samples of all tables contained therein are presented in this Guide to Foreign Trade Statistics.

In developing the U.S. foreign trade statistics program it was recognized that to be of maximum value it was necessary that the U.S. trade data be relatable on one hand to that of our trading partners and, on the other hand, to data on domestic output. Accordingly, a "building block" approach was taken in the development and/or adaptation of the commodity classification systems used in compiling the U.S. foreign trade statistics. By providing and adapting the necessary individual commodity classifications used in exports and imports as building blocks and arranging and/or rearranging the individual classifications (building blocks), commodity data are presented in terms of classifications structured both on the United Nations Standard International Trade Classification, used by most trading nations of the world, and the U.S. Standard Industrial Classification, the classification system used in compiling data on domestic output. Other rearrangements of the basic classification building blocks permit presentation of the data in terms of "end-use" categories, etc. The interrelationships among the various commodity classification systems used to compile the U.S. foreign trade statistics are shown in U.S. Foreign Trade Statistics Classifications and Cross-Classifications, which is available to the public either for purchase or reference.

The material in this Guide reflects any changes made in the foreign trade statistical program since the release of the 1970 issue of the Guide. The reports and tabulations listed herein represent current plans for the release of foreign trade statistical data during 1971. In view of the dynamic nature of the foreign trade statistics program and the desire to keep this program responsive to the varying needs of users, it is always possible that additional changes in the program may be required. As in the past, any changes of a substantial nature affecting the coverage or presentation of the statistics will be announced in the appropriate publications.

## Chapter II - Description of the Foreign Trade Statistics Program

### IMPORT STATISTICS

#### Coverage

The import statistics reflect both government and nongovernment imports of merchandise into the U.S. customs area (includes the 50 States, the District of Columbia, and Puerto Rico) without regard to whether the importation involves a commercial transaction. The statistics exclude the following: Shipments between the United States and Puerto Rico, between the United States and its possessions (including the Virgin Islands), and between these outlying areas; imports into U.S. possessions; American goods returned to the United States by U.S. Armed Forces; in-transit shipments through the United States when documented as such with Customs; shipments not considered to be imports for statistical purposes or shipments of relatively small significance in terms of total value or statistical importance, such as personal and household effects, temporary imports, and low-valued nondurable imports by mail; issued monetary coins of all component metals; and gold in the form of ores, concentrates, waste and scrap, and refined bullion. Silver in these forms, which was excluded from the statistics prior to January 1969, is now being included except where otherwise noted.

#### Types of Imports

Imported merchandise is reported as "general imports" and "imports for consumption."

General imports are a combination of entries for immediate consumption and entries into customs-bonded warehouses. With certain exceptions as indicated above, these data reflect total arrivals of merchandise, whether such merchandise enters consumption channels immediately or is entered into warehouses under customs' custody to be subsequently withdrawn for consumption or withdrawn for exportation.

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. With certain exceptions as indicated above, these data reflect the total of commodities entered into U.S. consumption channels.

For statistical purposes, imports are classified by the type of transaction, for which "Types of Imports" codes are shown in some of the import reports or machine tabulations. General imports are a combination of types 1, 3, 5, and 6, as indicated below, while imports for consumption are a combination of types 1, 2, 5, and 6.

Type 1 merchandise, entered for immediate consumption;<sup>1</sup>

<sup>1</sup>The terms "entered for immediate consumption" and "withdrawn from warehouse for consumption" are taken from the language used in handling the transactions through customs and are sometimes misleading in their implication that the merchandise is immediately assimilated by being processed, merchandised, or consumed. Although all customs barriers to such assimilation have been removed, merchandise for "immediate consumption" may, in fact, be ware-

Type 2 merchandise withdrawn from bonded storage warehouses for consumption,<sup>1</sup> withdrawn from bonded smelting and refining warehouses for consumption or for export, and transferred from bonded storage warehouses to bonded manufacturing warehouses for manufacturing and export;

Type 3 merchandise entered into bonded storage warehouses, and entered into bonded smelting and refining warehouses;

Type 4 merchandise withdrawn from bonded storage warehouses for exportation (compilation of statistics discontinued effective March 1958);

Type 5 merchandise entered into bonded manufacturing warehouses for processing and subsequent export of the main product; and

Type 6 merchandise entered into bonded storage warehouses in foreign trade zones as "privileged" merchandise.<sup>2</sup>

#### Monthly Carryover

It is the objective of the compiling procedures, insofar as practical, to include shipments in the import statistics for the month of import which, in general, is based on the date of filing of the import entry (immediate consumption or warehouse entry) or warehouse withdrawal document.<sup>3</sup> However, because of processing problems, there has always been a carryover of a small percentage of items from the proper month to a subsequent month (usually the month immediately following).

In general, except for the month when a change in the carryover is introduced, the carryover should have little

housed by the importer outside of customs custody. In the case of withdrawals for "consumption," although duties have been paid and the goods released from customs control, they may remain in storage for a further period of time. Any of this "for consumption" merchandise, of course, could conceivably be exported subsequently to its release from customs custody, and thus never enter actual U.S. consumption channels. For these reasons the term "imports for consumption" is somewhat inappropriate to describe the statistical series. Many countries use the term "special imports" to designate statistics compiled on this basis.

<sup>2</sup>"Privileged status" for foreign merchandise in a foreign trade zone means that a warehouse entry is filed for the merchandise and the tariff classification for duty purposes and the amount of duty are determined on the basis of the classification of the merchandise and the duties applicable when the warehouse entry is filed. This classification and amount of duty apply to the merchandise if it is brought into the customs area at a later date, even though the rate of duty or the merchandise itself may have been changed in the meantime. Ordinarily an import entry is not filed when foreign merchandise enters a foreign trade zone, but is filed when the merchandise leaves the foreign trade zone and enters U.S. customs territory.

<sup>3</sup>For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward customs manifest for the vessel).

effect on month-to-month comparisons of overall import totals since the carryover of the previous month should compensate roughly for that of the following month. For smaller segments--commodity, country, and commodity-by-country totals--there is also some compensation on a month-to-month basis, but comparisons should be made in awareness of the possibility that the figures for a given month may represent more or less than the amounts shipped during the month, especially where the volume of trade is not large.

### Source of Information

The statistics on U.S. imports of merchandise are compiled from information reported on customs import documents, which are required to be filed with customs officials. Statistical factors of country of origin, net quantity, value, and commodity classification are verified by customs officials on formal consumption and warehouse entries filed for transactions valued over \$250 which are ordinarily subject to examination for customs appraisal purposes. The statistical copy of the entry is corrected if it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 6 percent of the total value of imports for consumption, while not subject to the verification procedure directly, should be improved indirectly (due to education of importers/brokers) by the verification of the warehouse entries to which they correspond.

### Valuation

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, and therefore excludes U.S. import duties, freight charges from the foreign country to the United States, and insurance. Value information is required to be reported on import entries in accordance with Sections 402 and 402a of the Tariff Act of 1930, as amended.

The definition given above is a very general interpretation of the bases for reporting import values. More specifically, with certain exceptions as indicated in the next paragraph, imports are reported in accordance with the provisions of Section 402, in terms of (1) the export value, or (2) the U.S. value, if the export value cannot be determined satisfactorily, or (3) if neither of these values can be determined satisfactorily, then the constructed value is reported.

Effective February 27, 1958, certain articles specified by the Secretary of the Treasury (Treasury Decision 54521) as well as all merchandise imported prior to that date, are reported in accordance with the provisions of Section 402a, in terms of (1) the foreign value or the export value, whichever is higher; (2) if these values cannot be satisfactorily ascertained, then the U.S. value is used; (3) if none of the preceding values can be satisfactorily ascertained, then the cost of production is used. However, for some articles (certain coal tar products, canned clams, and certain knit wool gloves), the value reported in the import statistics is the American selling price. For definitions of each of these bases of valuation, reference should be made to Sections 402 and 402a of the Tariff Act of 1930, as amended.

The data for "Dutiable value", shown in some reports, represent the value of the foreign components contained

in products imported into the United States for immediate consumption. The data for "Calculated duty" represent the estimated import duties and taxes on imports for consumption collected under rates established by the Tariff Act of 1930 as amended by the Tariff Classification Act of 1962, the Internal Revenue Code, Public Laws, and Presidential Proclamations. The data on calculated duty have not been verified. Therefore, these data should be used with caution and only after verification of the data shown by actual calculation (under the applicable rate or rates of duty for commodity classifications as shown in Tariff Schedules of the United States Annotated).

### Commodity Information

The basic import data are initially compiled in terms of the commodity classifications in Tariff Schedules of the United States Annotated (TSUSA). In reports such as FT 135 and IM 150/155, the TSUSA data are presented in terms of a rearranged commodity classification system--Schedule A, Statistical Classification of Commodities Imported Into the United States, which is based on the Standard International Trade Classification, Revised (SITC).<sup>4</sup> Schedule A was constructed by the Bureau of the Census in order to provide for the summarization of data for the approximately 10,000 TSUSA classifications into about 2,400 commodity groupings which are meaningful in terms of commodities important in the U.S. import trade and, at the same time, to provide data in terms of the Standard International Trade Classification outline which are comparable, insofar as possible, to the foreign trade statistics compiled by other trading nations.

The foreign trade statistics program includes monthly and annual import data in terms of both Schedule A and TSUSA classifications. In addition, annual data in terms of classifications based on the Standard Industrial Classification (SIC) are also released. This rearrangement of the import data into a structure related to the origin of production is issued as soon as possible after the compilation of the original annual import data. Information regarding the SIC-based import product classifications is contained in Report FT 210 which presents import data in SIC-based product classification by area-of-origin arrangement. Additional data in terms of the SIC-based classifications are contained in tabulations IA 275 and IA 276.

Information on imports of commodities classified on the basis of "end use" is contained in machine tabulation IM 171. These data are available for reference use at principal locations.

Additional information regarding commodity classifications is contained in a comprehensive publication entitled U.S. Foreign Trade Statistics Classifications and Cross-Classifications. This publication brings together all the schedules of commodity and other trade classifications and cross-classifications currently being used in the compilation and publication of U.S. import and export statistics. Included, for example, are tables showing the TSUSA import classifications and their correlation to the categories comprising end-use and SIC-based product classifications, and the cross-classification between Schedule A and TSUSA classifications. This publication

<sup>4</sup>United Nations Statistical Papers, Series M, No. 34, 1961.

also includes other classification schedules, as indicated elsewhere in pertinent sections of this explanation. Copies of this publication are available for reference use at Department of Commerce field offices.

### Country and Area of Origin

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the transactions are credited to the country of shipment.

In foreign trade reports and tabulations, countries are presented by name and/or code as shown in Schedule C, Classification of Country Designations for U.S. Foreign Trade Statistics. (In some import reports, the country name or code is followed by the code 0 (or blank) to indicate country of origin, or the code 1 to indicate country of shipment.) Country names which are abbreviated in reports and tabulations to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as Annex B in Tariff Schedules of the United States Annotated and is included in the publication U.S. Foreign Trade Statistics Classifications and Cross-Classifications. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

The major world areas for which foreign trade data are shown represent groupings of individual Schedule C countries with the exceptions of Canada, the United Kingdom, and Japan, which are treated as separate areas. A list showing the major world areas and the individual countries included in each area appears in the above-mentioned publication containing classifications and cross-classifications. The country designations UNIDENT and Unidentified Countries are used to reflect imports from countries which could not be identified because of illegible reporting on import entries for low-valued shipments.

### Customs District for Imports

For imports by all methods of transportation combined, merchandise is shown as imported into the customs district of entry, i.e., the district in which the merchandise is cleared through customs for entry into consumption channels or entered into customs warehouses. In either case, this may not be the district at which the merchandise arrived in the United States nor its final place of destination. When separate data are shown for imports by vessel and air, the customs district shown is the district of unloading, which may not be the same as the district of entry. Imports by mail are credited to the district in which the import entry is filed. Imports credited to interior districts represent imports by air or imports leaving customs custody in such districts after having been transported in customs bond from a border point or seaport.

The names and codes of the customs districts and ports are listed in Schedule D, Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics. Imports of vessels moving under their own power or afloat are included under a single code

(District 60) and are not reported by individual customs district of entry. Also, estimates for shipments valued \$250 and under are reported under a single code (District 70). Schedule D is published as Statistical Annex A in TSUSA and is included in the publication U.S. Foreign Trade Statistics Classifications and Cross-Classifications. Copies of Schedule D may also be obtained free of charge from the Bureau of the Census.

### Estimated Data for Low-Valued Imports

The import statistics include estimated data for shipments valued under \$251 reported on both formal and informal entries. (Informal entries generally contain items valued not more than \$250.) The estimates for 1971 are based on a 1-percent sample. (A 5-percent sample, in effect every 3 years, was used to estimate data for 1970 and 1967. For other periods, a 1-percent sample has been used.) The estimates for shipments valued \$250 and under are (1) shown under Schedule A numbers 990.0000, 990.0, 990, and 99 and included in the Section 9 total; and (2) shown under TSUSA numbers 999.9500 and 999.9 and included with other items in the totals for codes 999 and 99, and the Schedule 9 total. These estimates are excluded from the other commodity codes. However, these estimates for low-valued shipments are included in the country, continent, and area totals and the total for U.S. imports. (The estimates for low-valued shipments do not reflect any imports by mail of duty-free merchandise valued under \$251, for which import entries are not required to be filed.)

The statistics for commodity codes from which the low-valued shipments are excluded are undercounted to the extent that such low-valued shipments of the particular commodity are made. The total value so excluded generally amounts to about 1 percent of the monthly import total. Although subject to considerable variability,<sup>5</sup> particularly where the estimated amounts are relatively small, these estimates for low-valued imports may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual areas or countries. An indication of the sampling variability of the estimates may be obtained by using the number in sample in conjunction with the variability table which appears in the General Explanation of Report FT 135.

### Unit Control

For some commodities, TSUSA requires that quantity information be reported in more than one unit, with value information reported with only one of the units. In tabulations which contain a unit control code column, the code zero is used (or column may be blank) for the unit with which value is reported, while the code 2 is

<sup>5</sup>The estimated total for low-valued imports reported under Schedule A commodity number 9900000 or TSUSA number 9999500 is subject to a sampling variability of about 4 to 5 percent, based on a 1-percent sample. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 4 to 5 percent. The estimates by country under the above-mentioned commodity numbers are subject to greater sampling variability--around 13 percent for countries with about 275 low-valued shipments in the sample; around 25 percent for countries with about 100 shipments in the sample; and over 25 percent for smaller sample sizes.

used for the unit with which value information is not reported. Unit control code 2 is also used for certain commodities for which additional quantity information is required to be reported and for which TSUSA provides specific reporting numbers (referred to as "quantity only" numbers). Information for these "quantity only" numbers is shown separately in monthly tabulation IM 145 UC-2 (annual data in IA 245 UC-2) and excluded from other import reports and tabulations.

### Economic Class and Economic Class Aggregate Codes

Following is a list of the economic class and economic class aggregate codes used in the reports and tabulations containing such data.

#### Economic class codes:

- 0--agricultural crude materials
- 1--nonagricultural crude materials
- 2--agricultural crude foodstuffs
- 3--nonagricultural crude foodstuffs
- 4--agricultural manufactured foodstuffs and beverages
- 5--nonagricultural manufactured foodstuffs and beverages
- 6--agricultural semimanufactures
- 7--nonagricultural semimanufactures
- 8--agricultural finished manufactures
- 9--nonagricultural finished manufactures

#### Economic class aggregate codes (totals for the economic class codes given above):

- 1--crude materials (economic class codes 0 and 1)
- 2--crude foodstuffs (economic class codes 2 and 3)
- 3--manufactured foodstuffs and beverages (economic class codes 4 and 5)
- 4--semimanufactures (economic class codes 6 and 7)
- 5--finished manufactures (economic class codes 8 and 9)

### Types of Duty (Rate Provision) Codes

The following codes, which appear in many of the import tabulations, indicate the free or dutiable status of merchandise imported into the United States.

#### Free Items <sup>6</sup>

- 10--Free under specific provisions for free status in TSUSA Schedules 1 to 7, inclusive, except "Products of Cuba"; or free under certain special classification provisions in Schedule 8 except those referred to, by item number, elsewhere in this list of rate provision codes.
- 11--Free as "Philippine articles" (see General Headnote 3(c) of TSUSA). Includes articles free under specific provisions for Philippine and Trust Territory articles in Part I, Temporary Legislation, of the Appendix to the Tariff Schedules in TSUSA.

<sup>6</sup>Philippine articles dutiable at the lowest prevailing rates or at fractional parts of the most favorable rate set forth in column numbered 1 of the TSUSA Schedules are shown in certain machine tabulations with 3-digit rate provision codes ending in "8." The first two digits of these codes are the regular rate provisions shown above and identify the lowest prevailing rate of duty, e.g., 128, 218, 418, etc. (See General Headnote 3(c) of TSUSA.)

12--Free under specific provisions for free status for "Products of Cuba" (see General Headnote 3(b) of TSUSA).

13--Free as articles to be processed under bond for exportation, including processes which result in articles manufactured or produced in the United States (see item 864.05 of TSUSA); or free for manufacture in bonded warehouse and export (Sec. 311, Tariff Act of 1930 and Sec. 312 as amended by Sec. 301(b) of the Tariff Classification Act of 1962).

14--Free as supplies for certain vessels and aircraft (Sec. 309, Tariff Act of 1930 and Sec. 10.59, Customs Regulations 1943). Includes equipment and repairs to vessels if duty remitted.

15--Free as articles for foreign governments granted free entry on a reciprocal basis, or as articles for public international organizations (Schedule 8, Part 3, Subpart B, Headnote 2 of TSUSA). (See items 841.10 and 841.20 of TSUSA.)

16--Free as articles of the United States government which otherwise would be dutiable under specific provisions in TSUSA Schedules 1 to 7, inclusive, were it not for the following provisions for free entry in TSUSA Schedule 8, Part 3, Subpart A:

Articles for military departments (TSUSA item 832.00)

Articles for General Services Administration (TSUSA item 833.00)

Articles for the Atomic Energy Commission (TSUSA item 834.00)

Articles for the Commodity Credit Corporation (TSUSA item 836.00)

18--Free under specific provisions established by temporary legislation, Presidential proclamation, or administrative action, except such specific temporary provisions for Philippine or Trust Territory articles covered by rate provision code 11. (See Part 1 of the Appendix to the Tariff Schedules in TSUSA.)

19--Free for export of supplies from bonded warehouse to the U.S. Armed Forces and to U.S. agencies and establishments abroad.

#### Dutiable Items <sup>6</sup>

Dutiable at rates prescribed in column numbered 1 of TSUSA Schedules 1 to 7, inclusive (including column 1 minimum rates prescribed in headnotes to those schedules but not including those rates prescribed for "Products of Cuba" in the Schedules).

- |                      |                    |
|----------------------|--------------------|
| 21. Specific rates   | 41. Compound rates |
| 31. Ad valorem rates | 51. Minimum rates  |

Dutiable at rates prescribed in column numbered 2 of TSUSA Schedules 1 to 7, inclusive (including column 2 minimum rates prescribed in headnotes to those Schedules.

- |                      |                    |
|----------------------|--------------------|
| 22. Specific rates   | 42. Compound rates |
| 32. Ad valorem rates | 52. Minimum rates  |

Dutiable at rates prescribed in column numbered 1 of the Appendix to the Tariff Schedules in TSUSA (except those for "Products of Cuba") when such rates differ from those prescribed for the specified item number in TSUSA Schedules 1 to 7, inclusive.

- |                      |                    |
|----------------------|--------------------|
| 23. Specific rates   | 43. Compound rates |
| 33. Ad valorem rates |                    |

Dutiable at rates prescribed in column numbered 2 of the Appendix to the Tariff Schedules in TSUSA when such rates differ from those prescribed for the specified item number in TSUSA Schedules 1 to 7, inclusive.

- |                      |                    |
|----------------------|--------------------|
| 24. Specific rates   | 44. Compound rates |
| 34. Ad valorem rates |                    |

Dutiable at rates, becoming effective after the effective date of the Tariff Classification Act of 1962, as a result of concessions granted in the most recent trade agreement. (Applicable only during the calendar year in which the new trade agreement rate initially is put into effect. Effective with statistics for January of the succeeding year, "1" is used as the last digit of the rate provision codes.)

- |                      |                    |
|----------------------|--------------------|
| 25. Specific rates   | 45. Compound rates |
| 35. Ad valorem rates |                    |

Composite rates (average rates) for articles subject to various rates based on component parts.

- |                      |                    |
|----------------------|--------------------|
| 26. Specific rates   | 46. Compound rates |
| 36. Ad valorem rates |                    |

Dutiable at rates based on those prescribed for "Products of Cuba" in any of the TSUSA Schedules or the Appendix thereto, or dutiable at fractional parts of such rates.

- |                      |                    |
|----------------------|--------------------|
| 28. Specific rates   | 48. Compound rates |
| 38. Ad valorem rates |                    |

Dutiable at various rates or at special rates.

70.

## EXPORT STATISTICS

### Coverage

With the exceptions described below, U.S. export statistics record the physical movement of merchandise out of the U.S. customs area to foreign countries, without regard to the method of financing, and without regard to whether or not the exportation takes place in connection with a commercial transaction.<sup>7</sup> The U.S. customs area

<sup>7</sup>Since it is the movement of merchandise out of the United States which is being measured, the statistics do not, of course, include U.S.-owned or/-financed goods moving directly from one foreign country to another.

includes the 50 States, the District of Columbia, and Puerto Rico. Exports from Puerto Rico to foreign countries are therefore included in the statistics. However, the statistics do not include shipments between the United States and Puerto Rico, between the United States and its outlying possessions (including the Virgin Islands), or between any of these outlying areas. (See the section on trade of outlying areas of the United States.)

The following types of shipments from the U.S. customs area to foreign countries are excluded from the statistics:

1. Shipments to U.S. Armed Forces for their own use, including shipments to U.S. armed services post exchanges, etc., and a few other types of shipments for U.S. Government use which, though not consigned to our Armed Forces, are similarly identified with activities carried on for the direct benefit of the U.S. Government. For example, the following are excluded:
  - a. Shipments of office furniture, equipment, and supplies for the use of U.S. Government offices.
  - b. Shipments of food, medicines and related items, and other commissary supplies to U.S. Government offices or employees for their own use.
  - c. Shipments for the construction and maintenance of U.S. satellite tracking stations in foreign countries.
  - d. Shipments to the Canal Zone for the exclusive use of the Panama Canal Zone government or the Panama Canal Company and shipments of supplies and material to contractors in the Panama Canal Zone for the construction and/or maintenance of the Panama Canal Zone and its facilities.
  - e. Shipments in connection with the U.S. Antarctic Research Program.
2. Merchandise shipped in transit through the United States from one foreign country to another, when documented as such through U.S. customs. (Foreign merchandise which has entered the United States as an import and is subsequently reexported is not treated as in-transit merchandise, and is shown separately as "Exports of Foreign Merchandise.")
3. Bunker fuel and other supplies and equipment for vessels and planes engaged in foreign trade. (Information on bunker fuel is published in Report FT 810. See the section on Summary Reports in chapter III.)
4. Gold in the form of ores, concentrates, waste and scrap, and refined bullion. (Silver in these forms, which was also excluded prior to January 1969, is now being included in the statistics, except where otherwise noted.) Issued monetary coins of all component metals continue to be excluded.
5. Electrical energy.

6. Some types of shipments of relatively small significance, such as low-valued or noncommercial exports by mail, temporary exports and the return of temporary imports, household and personal effects of travelers, goods for the personal use of U.S. Government employees abroad, etc.

### Monthly Carryover

In general, compiling procedures provide for the inclusion of shipments in the statistics for the month of export.<sup>8</sup> However, because of processing problems, there has always been a carryover of a few percent of shipments from their proper month to a subsequent month, usually the following month. The carryover should have little effect on month-to-month comparisons of overall export totals since the carryover of the previous month should compensate roughly for that of the following month.

For smaller segments--commodity, country, and commodity by country totals--there is also some compensation on a month-to-month basis, but comparisons should be made in awareness of the possibility that the figures for a given month may represent significantly more or less than the amounts shipped during the month, especially where the volume of trade is not large.

### Definition of Exports of Domestic and Foreign Merchandise

Exports of domestic merchandise include commodities which are the growth, produce or manufacture of the United States, and commodities of foreign origin which have been changed in the United States from the form in which they were imported, or which have been enhanced in value by further manufacture in the United States. Sugar refined in this country from imported raw sugar, flour ground from imported wheat, and ores or metal smelted or refined from imported ores or metal are examples of commodities considered to be domestic for statistical purposes when exported to a foreign country. Also when material or parts of foreign origin are imported into the United States and incorporated with material or parts produced in the United States, the complete product is considered to be a domestic product and the imported parts lose their identity as foreign merchandise. Exports of foreign merchandise include commodities of foreign origin which have entered the United States as imports and which, at the time of exportation, are in substantially the same condition as when imported.

### Source of Information

The source of information on export shipments (except for Department of Defense Military Assistance Program Grant-Aid shipments which are reported directly to the Bureau of the Census by the Department of Defense) is the Shipper's Export Declaration, Commerce Form 7525-V, which exporters are required to file with customs officials.

<sup>8</sup>With minor exceptions, the date of export for shipments other than by mail is considered to be the date when the shipment leaves the United States, or, in the case of vessel or air shipments, the date when the carrier on which it leaves the United States departs (or is cleared) from the port at which the merchandise was laden on such carrier. For mail shipments, the date of export is considered to be the date of mailing.

### Valuation

The value reported in the export statistics is defined as the value at the U.S. port of export, based on the selling price (or cost if not sold), including inland freight, insurance, and other charges to the U.S. port of export. The value, as defined, is equivalent to an f.a.s. (free alongside ship) value, excluding the cost of loading the merchandise aboard the exporting carrier and excluding freight, insurance, and any other charges or transportation costs beyond the port of export. However, the statistics may not always reflect the value as defined above, as exporters sometimes find it difficult to assign a value in accordance with this definition. For example, the export value for a rail or truck shipment from an interior U.S. point to an interior point in Canada or Mexico should include freight and other charges to, but not beyond, the border port of exportation. In some instances, however, the value reported by the shipper may completely exclude such charges (particularly where the usual price quotation is f.o.b. an interior U.S. point) or, on the other hand, may reflect the cost of delivering the merchandise to the foreign place of destination. For vessel or air shipments, the value reported on the declaration may include ocean or air freight and insurance charges beyond the port of export, which should not be included. For certain types of transactions the export value may be difficult to determine, as in the case of shipments from a business concern to its own subsidiary or affiliate abroad. The extent to which the statistics reflect the stated value definition depends largely upon the accuracy of reporting by shippers on their export declarations.

### Commodity Information

Export commodity information is compiled in accordance with the classifications in Schedule B, Statistical Classification of Domestic and Foreign Commodities Exported From the United States. Schedule B, which is based on the Standard International Trade Classification, Revised (SITC),<sup>9</sup> provides detailed classifications or "building blocks" which permit comparison of the U.S. export statistics with the foreign trade statistics of other countries as well as with data on domestic production.

Some of the Schedule B commodity descriptions used in foreign trade reports and tabulations are necessarily abbreviated to save printing costs or because of limited space and therefore, in many cases, they do not contain all of the qualifying information necessary to define completely the commodity for which statistics are shown. For complete definition of the individual Schedule B commodity classifications, reference should be made to the 1971 edition of Schedule B.

Information on individual export shipments valued \$250 and under (under \$100 prior to October 1969) is reported under Schedule B number 931.0040 without classification by commodity. Value information for such shipments is estimated each month on the basis of established percentages of the individual country totals. The statistics for commodity classifications other than Schedule B number 931.0040 are undercounted to the extent that such low-valued shipments of the commodity are made.

<sup>9</sup>United Nations Statistical Papers, Series M, No. 34, 1961.

In addition to monthly and annual export data for Schedule B classifications, annual data in terms of classifications based on the Standard Industrial Classification (SIC) are also released. This rearrangement of the export data into a structure related to the origin of production is issued each year as soon as possible after the compilation of the original annual export data. Information regarding the SIC-based export product classifications is contained in Report FT 610 which presents export data in SIC-based product classification by area of destination arrangement. Additional data in terms of the SIC-based classifications are contained in tabulations EA 675 and EA 676.

Information on exports of commodities classified on the basis of "end-use" is contained in machine tabulation EM 571. These data are available for reference use at principal locations.

The comprehensive publication entitled U.S. Foreign Trade Statistics Classifications and Cross-Classifications brings together all the schedules of commodity and other trade classifications and cross-classifications currently being used in the compilation and publication of U.S. export and import statistics. For example, Schedule B classifications and their respective correlations to the categories comprising end-use and SIC-based product classifications, as well as similar classifications and cross-classifications relating to the import statistics, are included. Copies are available for public reference use at Department of Commerce field offices.

### Country and Area of Destination

The country of destination is defined as the country of ultimate destination or the country where the goods are to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. If the shipper does not know the country of ultimate destination, the shipment is credited to the last country to which the shipper knows that the merchandise will be shipped in the same form as when exported. It follows, therefore, that the statistics will tend to be overcounted for shipments to transshipment countries such as Hong Kong, Belgium, Netherlands, etc., and undercounted for other countries.

Countries are presented by name and/or code as shown in Schedule C, Classification of Country Designations for U.S. Foreign Trade Statistics. Country names which are abbreviated in reports and tabulations to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered to be a part of the country for statistical purposes. Schedule C is published as part of Schedule B and is included in the publication U.S. Foreign Trade Statistics Classifications and Cross-Classifications. A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

The major world areas for which foreign trade data are shown represent groupings of individual Schedule C countries with the exceptions of Canada, the United Kingdom, and Japan which are treated as separate areas. A list showing the major world areas and the individual countries included in each area is included in the above-mentioned publication containing classifications and cross-classifications.

### Customs District for Exports

With the exceptions mentioned below, export shipments are credited statistically to the customs district through which the shipment clears when it leaves the United States. Therefore, the customs district shown in the statistics is not necessarily the district in which the merchandise was grown, manufactured, or otherwise originated.

Exports are credited to customs districts as follows:

1. For exports by vessel or air, the shipments are credited to the customs district in which the merchandise is loaded on the vessel or aircraft which takes the merchandise out of the country.
2. For exports by rail, truck, or pipeline, the shipments are credited to the customs district through which the merchandise crosses the U.S. border into foreign territory.
3. Aircraft exported under their own power are credited to the customs district from which they are flown out of the United States.

The names and codes of the customs districts and ports are listed in Schedule D, Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics. All mail shipments are credited to one special district (District 80) and are not reported according to the geographical location of the post office from which the merchandise was mailed nor the customs district from which the mail leaves the United States. Likewise, vessels moving under their own power or afloat are reported under District 60 and shipments individually valued under \$251 are reported under District 70. Schedule D is published as a part of Schedule B and is included in the publication containing classifications and cross-classifications, mentioned above. Copies of Schedule D may also be obtained from the Bureau of the Census.

### Security Restrictions

For certain commodities, referred to as Special Category commodities, security restrictions prevent the release of export information in as much detail as is released for other commodities. (Copies of a list of the Special Category commodities, which was published in the January 1970 issue of Report FT 410, may be obtained from the Bureau of the Census.) For each 7-digit Schedule B number which is classified as a Special Category commodity, data showing total U.S. exports of the commodity to all countries combined are released, without area, continent, country of destination, customs district of exportation, or other detail shown for the commodity. Exports of Special Category commodities are included in total export figures, and in Schedule B section, division, group, and subgroup commodity totals, without area, continent, country, or other detail shown for the Special Category commodities. Special Category shipments are also included in area and continent totals, and in the totals for individual countries except a few for which security regulations still restrict the release of Special Category information. However, Special Category shipments are not included in individual customs region or district totals. In reports showing

data by method of transportation, the detailed vessel and air statistics (such as those shown in commodity, area, continent, or country arrangement) also exclude Special Category shipments.

### Estimated Data for Low-Valued Exports

Effective September 1970, the statistics for countries other than Canada reflect fully compiled data for shipments valued \$500 and over combined with estimated data for shipments valued \$251-\$499, based on a 50-percent sample of such shipments. (During January-August 1970, data for shipments valued \$251-\$499 to countries other than Canada were fully compiled). For Canada, the statistics reflect fully compiled data for shipments valued \$2,000 and over combined with estimated data for shipments valued \$251-\$1,999 based on a 10-percent sample of such shipments. Data for shipments valued less than \$251 to all countries are estimated from factors based on established percentages of the individual country totals.<sup>10</sup>

Details regarding the sampling and estimating procedures for shipments to Canada and other countries are contained in Report FT 410 and other publications. Information is also given regarding the effect of the estimating procedures on the reliability of the data for Canada and other countries and a table is provided which, in conjunction with the number in sample, can be used to obtain an approximation of the sampling variability of the value data for exports of individual commodities to Canada, on a better than 2 chances out of 3 basis.

### STATISTICS ON TRADE BY METHOD OF TRANSPORTATION

Many of the current foreign trade reports and tabulations contain data on imports or exports by all methods of transportation combined, with separate data for vessel and air shipments, the methods of transportation by which the bulk of foreign trade shipments are imported into or exported from the United States (with the exception of trade with Canada and Mexico which moves primarily by rail or truck). In addition, summary reports and tabulations containing data exclusively on waterborne or airborne trade are also prepared. (For further information regarding specific reports and tabulations, see chapters III and IV.)

In using the statistics on trade by vessel, air, and all methods of transportation, it should be noted that there are some differences in the coverage of these statistics, primarily as follows:

1. The data for "all methods of transportation" include exports and imports by vessel, air, rail, truck, air mail, parcel post, and other methods of transportation. The data for vessel and air exports and imports represent waterborne and airborne shipments only (merchandise actually transported aboard a vessel or an aircraft.)

2. Imports and exports of (a) vessels moving under their own power or afloat and (b) aircraft flown into or out of the United States are included in the "all methods" data but excluded from the vessel and air statistics.

<sup>10</sup>The factors are established by observation of the percentage relationship of the under-\$251 shipments to the individual country totals in past periods.

3. Mail and parcel post shipments (including those transported by vessel or air) are included in the "all methods" data but excluded from the vessel and air statistics.

4. Exports of Special Category commodities, which are included in the "all methods" data (see Security Restrictions, above) are included in the overall totals for vessel value and air value and shipping weight, but not in the overall vessel shipping weight total nor in any of the detailed vessel and air statistics.

The shipping weight figures shown for vessel and air shipments represent the gross weight of shipments, including the weight of moisture content, wrappings, crates, boxes, and containers (other than containers used for containerized cargo). Shipping weight information is required to be reported for shipments by vessel and air only.

The vessel and air statistics represent shipments which arrived in or departed from the United States by these methods of transportation. In some instances shipments from abroad arrive in Canada or Mexico by vessel or air and are then transshipped through those countries to the United States by rail or truck. In the U.S. import statistics, such shipments are not reported as vessel or air shipments but, of course, are included in the "all methods" statistics. Likewise, in the case of exports, if shipments are sent by rail or truck from the United States to Canada or Mexico for exportation by vessel or air to another country of destination, the shipments are not reported as vessel or air shipments but are included in the "all methods" statistics as exports to the country of ultimate destination.

### EXPORTS AND IMPORTS ADJUSTED FOR SEASONAL AND WORKING-DAY VARIATION

Effective with the October 1960 statistics, the Bureau of the Census began presenting seasonally adjusted monthly import and export data in Summary Reports FT 900-I, Total Import Trade, and FT 900-E, Total Export Trade. Beginning with the April 1968 statistics, the Bureau expanded its seasonal adjustment program with additional data being presented in Report FT 900, Export and Import Merchandise Trade, which superceded Reports FT 900-I and 900-E. Report FT 990, Highlights of U.S. Export and Import Trade, which began presenting seasonally adjusted monthly export and import totals beginning with the January 1967 issue, was expanded to include a section of charts and tables containing seasonally adjusted commodity and world area data for both exports and imports, effective with the May 1968 issue.

Other sources containing seasonally adjusted foreign trade data are:

1. U.S. Exports and Imports, 1958-1968 (Adjusted and Unadjusted Data With Seasonal and Working-Day Factors)--This publication supercedes the former pamphlet Working-Day and Seasonal Adjustment Factors and Months for Cyclical Dominance (MCD). The current publication contains charts and tables presenting unadjusted and adjusted data for total exports and imports, merchandise trade balance, commodity and world area data for exports and imports, and moving average data. An explanation

of the seasonal adjustment method and other information regarding the adjustment program are also included.

2. Foreign Commerce and Navigation of the United States--The 1965 edition contains historical data by month from January 1958 through December 1965.
3. Business Conditions Digest--This publication presents adjusted totals for exports, imports, and merchandise trade balance from January 1950 through the current month and for the most recent months and quarters.

## TRADE OF OUTLYING AREAS OF THE UNITED STATES

### Coverage

The coverage of the statistics on U.S. trade with Puerto Rico and outlying U.S. areas is the same as the coverage of the statistics on U.S. trade with foreign countries, as explained in preceding sections of this explanation relating to import and export statistics.

Effective January 1969, the statistics on shipments from the United States to Puerto Rico and U.S. possessions show information by method of transportation, i.e. separate data are presented for movements by vessel and by air, the methods of transportation by which most shipments in this trade are made. For further information regarding the handling of "method of transportation" data, see the section above on "Statistics on Trade by Method of Transportation."

Statistics on trade between the United States and Puerto Rico and U.S. possessions are published in Report FT 800, with additional data presented in machine tabulations. (See chapter IV for information regarding tabulations.) Information on shipments from the United States to Midway Island, Wake Island, Guam, and Canton and Enderbury Islands is no longer being compiled by the Bureau of the Census as a result of the elimination of the requirement for filing Shipper's Export Declarations for such shipments, effective in March 1970. Data on imports into the United States from these possessions are not affected by this change and continue to be presented in Report FT 800 and tabulations on the same basis as before.

### Source of Information

The source of information for shipments from the United States to Puerto Rico, the Virgin Islands, and American Samoa, and from Puerto Rico to the United

States, is the Shipper's Export Declaration (Commerce Form 7525-V) which shippers are required to file with customs officials. The source documents used to compile information on shipments from the Virgin Islands and other possessions to the United States are the import entries which are also filed with customs officials.

### Valuation

The valuation definition used in the statistics on shipments from the United States to Puerto Rico, the Virgin Islands, and American Samoa and shipments from Puerto Rico to the United States is the same as the value definition for U.S. exports to foreign countries, i.e., the value at the port of exportation. It is based on the selling price (or cost if not sold), and includes inland freight, insurance, and other charges to the port of exportation. The value shown in the statistics on shipments from the Virgin Islands and other possessions to the United States is defined generally as the market value in the place of origin, excluding any U.S. import duties, freight, and insurance.

### Trade with Foreign Countries

The Virgin Islands of the United States are not a part of the U.S. customs area for the collection of duties and their trade is not included in total U.S. export or import statistics. However, export declarations and import entries are filed with customs officials in the Virgin Islands in the same way as for the U.S. customs area, and separate statistics are compiled by the Bureau of the Census from these documents covering the trade of the Virgin Islands with foreign countries. Information on imports from foreign countries into the Virgin Islands for consumption is presented in monthly machine tabulations IM 141-V and IM 142-V and in annual tabulations IA 241-V and IA 242-V. Data on exports from the Virgin Islands to foreign countries are presented in machine tabulation EM 591.

Puerto Rico is a customs district within the U.S. customs area, and its trade with foreign countries is included in the export and import statistics showing the trade of the United States with foreign countries. The statistics on trade of Puerto Rico with foreign countries represent exports and imports through the Puerto Rico Customs District and do not necessarily represent exports of commodities originating in Puerto Rico nor imports of commodities for direct consumption in Puerto Rico. Statistics showing commodity detail for such trade are presented in machine tabulations IM 154 and EM 563.

Data on trade of other outlying areas with foreign countries are not included in reports or tabulations currently released by the Census Bureau.

### Symbols in This Publication:

FT	a foreign trade publication	IQ	an import quarterly tabulation
EM	an export monthly tabulation	IA	an import annual tabulation
EQ	an export quarterly tabulation	SA	a shipping annual tabulation
EA	an export annual tabulation	SM	a shipping monthly tabulation
IM	an import monthly tabulation		

## Chapter III - Published Foreign Trade Reports

The published reports containing foreign trade data fall into two general categories, (a) those containing summary statistics and (b) those containing more detailed data.

### SUMMARY REPORTS

Reports containing summary statistics are released monthly unless otherwise indicated. In some instances monthly reports include both current monthly and cumulative data for the current year, with annual totals appearing in the December issue. For those monthly reports which do not include cumulative data, a separate annual issue is published. A list of the summary reports by number and title is given below. Illustrations of the data included in the reports are presented on the pages indicated. These exhibits indicate the general format and type of information to be found in the reports. Summary reports may be obtained from the Bureau of the Census by subscription. (See order blank at the back of this publication.)

FT 810	Bunker Fuels. Oil and Coal Laden in the United States on Vessels Engaged in Foreign Trade (See page 12.)
FT 900	Export and Import Merchandise. Seasonally Adjusted and Unadjusted Data. (See pages 13-16.)
FT 975	Vessel Entrances and Clearances. Number and Tonnage, Flag, District and Port. Published annually only. (See page 17.)
FT 985	Waterborne Exports and General Imports. Trade Area, District, Port, Type Service and U.S. Flag. (See pages 18-23.)
FT 986	Airborne Exports and General Imports. Shipping Weight and Value, Customs District and Continent. (See page 24.)
FT 990	Highlights of Exports and Imports. Seasonally Adjusted and Unadjusted Data, Commodity, Country, Customs District, Method of Transportation. (See pages 25-70.)
FT 2402	Gold Movements. Troy Oz., Dollars, Countries, Customs District. (See page 71.)

### DETAILED REPORTS

Published reports containing more detailed statistics than those presented in the summary reports are listed

below by report number and title of report. These reports contain current monthly and cumulative data with annual totals appearing in the December issue, except as noted. Illustrations of tables contained in the reports are shown on the pages indicated for each report. (See order blank at the back of this publication.)

FT 130	General Imports of Cotton Manufactures. Country of Origin and Geneva Agreement Category. Current month and cumulative from preceding October to date. (See page 72.)
FT 135	Imports. General and Consumption, Schedule A Commodity by Country (See pages 73 and 74.)
FT 410	Exports. Schedule B Commodity by Country (See pages 75 and 76.)
FT 800	Puerto Rico and U.S. Possessions. Monthly issues contain current monthly data only. Annual data published separately. (See pages 77-79.)

### ANNUAL REPORTS

FT 150	General Imports. Schedule A Commodity Groupings, World Area, Country, and Method of Transportation. (See pages 80 and 81.)
FT 155	General Imports. World Area, Country, Schedule A Commodity Groupings, and Method of Transportation. (See pages 82 and 83.)
FT 210	Imports for Consumption and General Imports. SIC-Based Products and Area (See page 84.)
FT 246	Imports for Consumption and General Imports. TSUSA Commodity and Country (See page 85.)
FT 450	Exports. Schedule B Commodity Groupings, World Area, Country, and Method of Transportation (See pages 86-88.)
FT 455	Exports. World Area, Country, Schedule B Commodity Groupings, and Method of Transportation (See pages 89-91.)
FT 610	Exports of Domestic Merchandise. SIC-Based Products and Area (See page 92.)

<sup>1</sup>Schedule B section and selected division descriptions are as follows:

- |  |  |
|--|--|
| 0. Food and live animals                             | 7. Machinery and transport equipment                             |
| 1. Beverages and tobacco                             | 71. Machinery, other than electric                               |
| 2. Crude materials, inedible, except fuels           | 72. Electrical machinery, apparatus, and appliances              |
| 3. Mineral fuels, lubricants, and related materials  | 73. Transport equipment  |
| 4. Animal and vegetable oils and fats                | 8. Miscellaneous manufactured articles, n.e.c.                   |
| 5. Chemicals   | 9. Commodities and transactions not classified according to kind |
| 6. Manufactured goods classified chiefly by material |  |

<sup>2</sup>Seasonally adjusted figures for section 7 may differ slightly from the sum of divisions 71, 72, and 73 since each is independently adjusted.

<sup>3</sup>Adjusted for seasonal and working-day variation using seasonal adjustment factors introduced in January 1971. Annual totals are not shown for seasonally adjusted data as such totals are not meaningful. Unadjusted data should be used for annual totals. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 2 were adjusted independently.

<sup>4</sup>In the absence of demonstrable seasonal patterns for this section, no seasonal adjustment factors have been applied to date.

<sup>1</sup>Schedule A section descriptions are as follows:

0. Food and live animals
1. Beverages and tobacco
2. Crude materials, inedible, except fuels
3. Mineral fuels, lubricants, and related materials
4. Animal and vegetable oils and fats

5. Chemicals
6. Manufactured goods classified chiefly by material
7. Machinery and transport equipment
8. Miscellaneous manufactured articles, n.e.s.
9. Commodities and transactions not classified according to kind

<sup>2</sup>Adjusted for seasonal and working-day variation using seasonal adjustment factors introduced in January 1971. Annual totals are not shown for seasonally adjusted data as such totals are not meaningful. Unadjusted data should be used for annual totals. The adjusted section totals in this table and similar overall monthly totals in tables 1 and 3 were adjusted independently.

<sup>3</sup>In the absence of demonstrable seasonal patterns for this section, no seasonal adjustment factors have been applied to date.

# Number and Net Registered Tonnage of U.S. and Foreign Flag Vessels Entered and Cleared With Cargo and in Ballast in the Foreign Trade of the United States, by Customs District and Port of Entry: Calendar Year

(Tons shown are net tons of 100 cubic feet carrying capacity of vessels and do not represent the actual weight of cargo carried. The customs district totals include all ports of entry within the district even though not shown)

Customs district and port of entry	Entrances										Clearances									
	Total all vessels			U.S. vessels			Foreign vessels				Total all vessels			U.S. vessels			Foreign vessels

## U.S. EXPORTS AND IMPORTS

Chart A. **U.S. Exports, General Imports, and Merchandise Trade Balance, Adjusted for Seasonal and Working-Day Variation: January 1966 to Date**

(In millions of dollars. Data are not adjusted for unusual changes in the level of activity or coverage such as happens during strikes and other events that may have adverse effects on the statistics)

<sup>1</sup> Represents exports of domestic and foreign merchandise excluding Department of Defense Military Assistance Program Grant-Aid shipments.

<sup>2</sup> Defined as exports (see footnote 1, above) minus general imports.

Table 1. **Exports, General Imports, and Merchandise Trade Balance, Adjusted for Seasonal and Working-Day Variation, by Month: January 1970 to Date**

(In millions of dollars)

<sup>1</sup>Schedule B section and selected division and Schedule A section descriptions are as follows: 0. Food and live animals; 1. Beverages and tobacco; 2. Crude materials, except fuels--inedible; 3. Mineral fuels, lubricants, and related materials; 4. Animal and vegetable oils and fats; 5. Chemicals; 6. Manufactured goods classified chiefly by material; 7. Machinery and transport equipment, (71. Machinery, other than electric, 72. Electrical machinery, apparatus, and appliances, 73. Transport equipment); 8. Miscellaneous manufactured articles, n.e.c.; 9. Commodities and transactions not classified according to kind.

Table 4. **Domestic Merchandise Including Department of Defense (DOD)  
Sections and Selected Divisions, Seasonally**

(In millions of dollars. In the absence of demonstrable seasonal patterns no seasonal adjustment factors have been applied to Schedule B sections ANIMAL AND VEGETABLE OILS AND FATS, MACHINERY AND TRANSPORT EQUIPMENT section and the sum of the three divisions shown may differ slightly since each is independently adjusted.)

# Adjusted and Unadjusted: 1970 and 1971

communist areas in Europe and Asia. This assignment of countries generally follows that made by the United Nations. In the absence of demonstrable seasonal patterns no seasonal adjustment factors have been these areas. Seasonally adjusted and unadjusted quarterly and cumulative totals are sums of the totals for the individual months. G - Percent change greater than 100. Z - Less than one-half of rounded unit)

<sup>1</sup>The figures for 1961 and subsequent years include information on exports of uranium, thorium, and related products. To obtain information on exports of these commodities for years prior to 1961, see the 1964 edition of Foreign Commerce and Navigation of the United States. <sup>2</sup>Represent only export shipments from the United States and differ from DOD Military Assistance Program Grant-Aid shipment figures under this program as follows: (a) Transfers of the material procured outside the United States and transfers from DOD overseas stocks are excluded from export shipments. (b) Export value is f.a.s., whereas DOD value, in most instances, is f.o.b., point of origin. (c) Effective with the February 1966 statistics, data for shipments reported by the DOD for a given month are included in Bureau of the Census reports in the second month subsequent to the month reported by the DOD. Data for shipments reported by the DOD were excluded from January 1966 statistics. <sup>3</sup>Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals. <sup>4</sup>Excludes information on shipments of silver ore, base bullion (including sweepings, waste, and scrap), and refined bullion. Information on exports of silver in these forms was published in the appendix to the January 1969 issue of this report.

Table E-3. Domestic and Foreign Merchandise--World Area and Country of Destination: 1971 and 1970

(In millions of dollars. Countries identified with an asterisk (\*) exclude information on shipments of Special Category commodities. Such data, if any, are grouped by area, as applicable, and shown at the end of the list of countries for the individual areas affected. Developed countries include Canada, Western Europe, Japan, Australia, New Zealand, and the Republic of South Africa. Developing countries include the rest of the world excluding communist areas in Europe and Asia. The assignment of countries generally follows that made by the United Nations. X--Not applicable. Z--Less than one-half of rounded unit.)

Table E-4. Domestic and Foreign Merchandise-U.S. Customs Regions and Districts: 1971 and 1970

(All vessel and air totals in this table exclude exports of vessels under their own power or afloat, mail shipments, and Special Category commodities. Exports of these commodities by all methods of transportation are included in the grand total, but are excluded from customs region and district totals. Customs region and district figures also exclude data on low-value shipments. Summary totals on exports of these commodities appear at the end of the table. X-Not applicable. Z-Less than one-half of rounded unit)

Table E-8. Domestic and Foreign Merchandise-U.S. Customs Regions, World Areas, and Method of Transportation: 1971

(All vessel and air totals in this table exclude exports of vessels under their own power or afloat, mail shipments, and Special Category commodities. Exports of these commodities by all methods of transportation are included in the grand total and in the world area totals at the top of the table but are excluded from the customs region by world area totals. Low-value shipments are included in the grand total and world area totals but are excluded from the customs region by world area totals. Summary totals on exports of these commodities appear at the end of the table. X-Not applicable. Z-Less than one-half of rounded unit)

<sup>1</sup>Data reflect adjustments for seasonal and working-day variation and do not necessarily add to annual unadjusted totals.

<sup>2</sup>Excludes information on shipments of silver ore, base bullion (including sweepings, waste, and scrap), and refined bullion. Information on imports of silver in these forms was published in the appendix to the January 1969 issue of this report.

<sup>3</sup>Includes about \$9.7 million of \$1-99 formal and \$1-250 informal entry shipments which are not included in the data in other reports.

<sup>1</sup>Commodities for which total shipments were valued less than \$1,000.

Table 1. Schedule A Groupings of Commodities and Method of Transportation

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments individually valued at less than \$251 are shown only under Schedule A subgroup 990.0 and included in data for all methods of transportation and for vessel and air. Where a description for a division or group code is omitted, the description immediately following that division or group code is applicable. Where the symbol "DO" appears in the description column for a Schedule A code, the description immediately preceding the code is applicable. Z--Less than half of the unit of measurement shown)

## Chapter IV - Foreign Trade Reference Material

As a part of its regular statistical program, the Census Bureau prepares tabulations and reports for public reference use which contain data in various arrangements and in greater detail than the statistics presented in published reports. The tabulations and reports, in general, contain both net quantity and value information. Some tabulations contain method of transportation information, i.e., separate data for shipments by vessel and air. In such cases, value data (and frequently net quantity data also) are presented for all methods of transportation combined, with separate shipping weight and value information shown for vessel and air shipments. In the import tabulations, method of transportation information is presented for general imports only. Imports for consumption data represent shipments by all methods of transportation combined. Also in the import tabulations, customs district information represents district of entry for both imports for consumption and general imports by all methods of transportation, but represents district of unloading for general imports by vessel and air when such data are shown separately.

Lists of the tabulations, showing identification number and a brief description of the general arrangement of the data in each tabulation, appear below. The general format of the tabulations is illustrated in exhibits on the indicated pages. If a tabulation contains both current monthly and cumulative data, annual information is presented in the December issue. (See list of annual tabulations for additional sources of annual data.) In those cases where both a monthly and an annual tabulation are prepared in the same arrangement, a single exhibit is presented, representing both the monthly and the annual tabulation.

### IMPORT TABULATIONS

(Include general imports and imports for consumption, unless otherwise indicated.)

#### Monthly Tabulations

- |          |  |             |   |
|----------|--|-------------|---|
| IM 136   | Continent by country of origin by TSUSA commodity by unit control by customs district and method of transportation. Current month. Annual data in IA 236, Part 1. (See page 98.)   | IM 145      | TSUSA commodity by unit control by country of origin by customs district by rate provision by type by economic class and method of transportation. Current month. Annual data in IA 245, Part 1. (See page 101.)  |
| IM 141-V | Imports for consumption into the Virgin Islands from foreign countries--TSUSA commodity by unit control by country of origin by customs district by type, all methods of transportation combined. Current month. Annual data in IA 241-V. (See page 99.) | IM 145 A    | TSUSA commodity by unit control by country of origin. Data in terms of TSUSA Schedules 1 through 7 commodity numbers for metal articles manufactured in the U.S., exported for further processing abroad, and returned to the U.S. for further processing (TSUSA no. 806.3000) and articles assembled abroad in whole or in part from U.S. components (TSUSA no. 807.0000). All methods of transportation combined. Current month. Annual data in IA 245 A. (See page 102.) |
| IM 142-V | Imports for consumption into the Virgin Islands from foreign countries--Country of origin by TSUSA commodity by unit control, all methods of transportation combined. Current month. Annual data in IA 242-V. (See page 100.)                            | IM 145 UC-2 | TSUSA commodity by unit control (unit control 2 only) by country of origin by rate provision by customs district by type by economic class, all methods of transportation combined. Current month. Annual data in IA 245 UC-2. (See page 103.)  |
|          |  | IM 146      | TSUSA commodity by unit control by country of origin, all methods of transportation combined. Imports for consumption only. Also shows dutiable value, calculated duty, and average ad valorem rate of duty. Current month and cumulative year-to-date. (See page 104.)   |
|          |  | IM 150/155  | Schedule A commodity groupings, world area, country of origin and method of transportation. General imports only. Current month and cumulative year-to-date. Tables 1 through 5. (See pages 105-109.)   |
|          |  | IM 154      | Customs district by country of origin by TSUSA commodity by unit control and method of transportation. Current month. Annual data in IA 254. (See page 110.)  |
|          |  | IM 160      | General imports into the United States from Midway Island, Wake Island, Guam, Canton and Enderbury Islands, and American Samoa. Country of origin by TSUSA commodity by unit control by customs district by type, all methods of transportation combined. Current month. (See page 111.)  |
|          |  | IM 161      | General imports into the United States from the Virgin Islands--TSUSA commodity by unit control by customs district by type, all methods of transportation combined. Current month. (See page 112.)   |

- IM 171 "End-use" commodity categories by area or country arrangement and vice-versa, all methods of transportation combined. General imports only. Current month, cumulative year-to-date, and individual quarters of the year. 11 parts. (See pages 113-115.)
- SM 305 Waterborne general imports--Type of vessel service by customs district and port of unlading by foreign port of lading by Schedule A subgroup by country of origin. Current month. Annual data in SA 305. (See page 116.)
- SM 305-IT Waterborne inbound in-transit shipments. Same arrangement as SM 305, above. Annual data in SA 305-IT. (See page 116.)
- SM 311 Waterborne general imports--Type of vessel service by trade area of lading by coastal district of unlading by country of lading by district of unlading. Current month. Annual data in SA 311. (See page 117.)
- SM 311-IT Waterborne inbound in-transit shipments. Same arrangement as SM 311, above. Annual data in SA 311-IT. (See page 117.)
- AE 350 Listing of vessel entrances, released in two parts. (See page 118.)
- (1) By name of vessel, in alphabetic order. Current month.
- (2) By name of vessel, in customs district, port, and manifest number arrangement. Current month.
- Annual Tabulations** (For additional sources of annual data, see the preceding list for those monthly tabulations which contain cumulative information).
- IA 236 Released in two parts:  
(1) Continent by country of origin by TSUSA commodity by unit control by customs district and method of transportation. (See IM 136, page 98.)  
(2) Continent by country of origin by TSUSA commodity by unit control by customs district, all methods of transportation combined. Also shows dutiable value and calculated duty for imports for consumption. (See page 119.)
- IA 241-V Imports for consumption into the Virgin Islands from foreign countries--TSUSA commodity by unit control by country of origin by customs district by type, all methods of transportation combined. (See IM 141-V, page 99.)
- IA 242-V Imports for consumption into the Virgin Islands from foreign countries--Country of origin by TSUSA commodity by unit control, all methods of transportation combined. (See IM 142-V, page 100.)
- IA 245 Released in two parts:  
(1) TSUSA commodity by unit control by country of origin by customs district by rate provision by type by economic class and method of transportation. (See IM 145, page 101.)  
(2) TSUSA commodity by unit control by country of origin by customs district by rate provision by type by economic class, all methods of transportation combined. Also shows dutiable value and calculated duty for imports for consumption. Issued semiannually. (See page 120.)
- IA 245 UC-2 TSUSA commodity by unit control (unit control 2 only) by country of origin by rate provision by customs district by type by economic class, all methods of transportation combined. (See IM 145 UC-2, page 103.)
- IA 245 A TSUSA commodity by unit control by country of origin. Data in terms of TSUSA Schedules 1 through 7 commodity numbers for metal articles manufactured in the United States, exported for further processing abroad, and returned to the United States for further processing (TSUSA no. 806.3000) and articles assembled abroad in whole or in part from U.S. components (TSUSA no. 807.0000), all methods of transportation combined. (See IM 145 A, page 102.)
- IQ 247 Schedule A commodity by country of origin, all methods of transportation combined. Cumulative data issued quarterly. (See page 121.)
- IA 253 Customs district by TSUSA commodity by unit control by country of origin, all methods of transportation combined. Also shows dutiable value and calculated duty for imports for consumption (See page 122.)
- IA 254 Customs district by country of origin by TSUSA commodity by unit control and method of transportation. (See IM 154, page 110.)
- IA 276 SIC-based 8-digit product code by country of origin, all methods of transportation combined. (See page 123.)
- SA 305 Waterborne general imports--Type of vessel service by customs district and port of unlading by foreign port of lading by Schedule A subgroup by country of origin. (See SM 305, page 116.)
- SA 305-IT Waterborne inbound in-transit shipments. Same arrangement as SA 305, above. (See SM 305-IT, page 116.)
- SA 311 Waterborne general imports--Type of vessel service by trade area of lading by

coastal district of unloading by country of lading by district of unloading. (See SM 311, page 117.)

- SA 311-IT Waterborne inbound in-transit shipments. Same arrangement as SA 311, above. (See SM 311-IT, page 117.)

### EXPORT TABULATIONS

(Include exports of domestic and foreign merchandise, shown separately, unless otherwise indicated.)

#### Monthly Tabulations

- EM 450/455 Schedule B commodity groupings, world area, country, and method of transportation. Current month and cumulative year-to-date. Tables 1 through 7. (See pages 124-130.)
- EM 522 Schedule B commodity by country of destination by customs district of exportation and method of transportation. Current month. Annual data in EA 622. (See page 131.)
- EM 522 (Double-Unit Supplement) Exports of unmanufactured cotton and selected manufactured products of cotton and other fibers--Schedule B commodity by country of destination by customs district of exportation, all methods of transportation combined. Current month. Annual data in EA 622 Double-Unit Supplement. (See page 132.)
- EM 531 Continent by country of destination by Schedule B commodity by customs district of exportation and method of transportation. Current month. Annual data in EA 631. (See page 133.)
- EM 537 Schedule B commodity totals, all methods of transportation combined. Current month. (See page 134.)
- EM 563 Customs district of exportation by country of destination by Schedule B commodity and method of transportation. Current month. Annual data in EA 663. (See page 135.)
- EM 571 "End-use" commodity categories by area or country arrangement and vice-versa, all methods of transportation combined. Current month, cumulative year-to-date, and individual quarters of the year. 11 parts. (See pages 136-138.)
- EM 591 Exports from the Virgin Islands to foreign countries--Schedule B commodity by country of destination, all methods of transportation combined. Current month. (See page 139.)
- EM 594 Shipments of merchandise from the United States to Puerto Rico and U.S. possessions (Virgin Islands and American Samoa only)--Schedule B commodity by country of

destination by customs district of exportation and method of transportation. Current month. Annual data in EA 694. (See page 140.)

- EM 596 Shipments of merchandise from the United States to Puerto Rico and U.S. possessions (Virgin Islands and American Samoa only)--Customs district of exportation by country of destination by Schedule B commodity and method of transportation. Current month. Annual data in EA 696. (See page 141.)
- SM 705 Waterborne exports of domestic and foreign merchandise--Type of vessel service by customs district and port of lading by foreign port or country/area of unloading by Schedule B subgroup by country of destination by country of origin. Current month. Annual data in SA 705. (See page 142.)
- SM 705-IT Waterborne outbound in-transit shipments. Same arrangement as SM 705, above, plus country of origin. Annual data in SA 705-IT. (See page 142.)
- SM 705 Supplement Waterborne Department of Defense controlled cargo under U.S. foreign aid programs and Special Category non-Department of Defense controlled cargo--Type of vessel service by customs district and port of lading by country/area of unloading. Current month. Annual data in SA 705 Supplement. (See page 142.)
- SM 711 Waterborne exports of domestic and foreign merchandise--Type of vessel service by trade area of unloading by coastal district of lading by country of unloading by district of lading. Current month. Annual data in SA 711. (See page 143.)
- SM 711-IT Waterborne outbound in-transit shipments. Same arrangement as SM 711, above. Annual data in SA 711-IT. (See page 143.)
- AE 750 Listing of vessel clearances, released in two parts. (See page 144.)
- (1) By name of vessel, in alphabetic order. Current month.
- (2) By name of vessel, in customs district, port, and manifest number arrangement. Current month.

#### Annual Tabulations

(For additional sources of annual data, see the preceding list for those monthly tabulations which contain cumulative information.)

- EA 622 Schedule B commodity by country of destination by customs district of exportation and method of transportation. (See EM 522, page 131.)

- EA 622 (Double-unit Supplement) Exports of unmanufactured cotton and selected manufactured products of cotton and other fibers--Schedule B commodity by country of destination by customs district of exportation, all methods of transportation combined. Released semi-annually and annually. (See EM 522 Double-Unit Supplement, page 132.)
- EQ 629 Schedule B commodity by country of destination, all methods of transportation combined. Cumulative data issued quarterly. (See page 145.)
- EA 631 Continent by country of destination by Schedule B commodity by customs district of exportation and method of transportation. (See EM 531, page 133.)
- EA 637 Schedule B commodity by month, all methods of transportation combined. Cumulative data issued semi-annually. (See page 146.)
- EA 663 Customs district of exportation by country of destination by Schedule B commodity and method of transportation. (See EM 563, page 135.)
- EA 664 Customs district of exportation by Schedule B commodity by country of destination and method of transportation. (See page 147.)
- EA 676 SIC-based 8-digit product code by country of destination, all methods of transportation combined. (See page 148.)
- EA 691 Exports from the Virgin Islands to foreign countries--Schedule B commodity by country of destination. All methods of transportation combined. (See EM 591, page 139.)
- EA 694 Shipments of merchandise from the United States to Puerto Rico and U.S. possessions (Virgin Islands and American Samoa only)--Schedule B commodity by country of destination by customs district of exportation and method of transportation. (See EM 594, page 140.)
- EA 696 Shipments of merchandise from the United States to Puerto Rico and U.S. possessions (Virgin Islands and American Samoa only)--Customs district of exportation by country of destination by Schedule B commodity and method of transportation. (See EM 596, page 141.)
- SA 705 Waterborne exports of domestic and foreign merchandise--Type of vessel service by customs district and port of lading by foreign port of unloading by Schedule B subgroup by country of destination. (See SM 705, page 142.)
- SA 705-IT Waterborne outbound in-transit shipments. Same arrangement as SA 705, above, plus country of origin. (See SM 705-IT, page 142.)

- SA 705 Supplement Waterborne Department of Defense controlled cargo under U.S. foreign aid programs and Special Category non-Department of Defense controlled cargo--Type of vessel service by customs district and port of lading by country/area of unloading. (See SM 705 Supplement, page 142.)
- SA 711 Waterborne exports of domestic and foreign merchandise--Type of vessel service by trade area of unloading by coastal district of lading by country of unloading by district of lading. (See SM 711, page 143.)
- SA 711-IT Waterborne outbound in-transit shipments. Same arrangement as SA 711, above. (See SM 711-IT, page 143.)

#### SOURCES OF FURTHER INFORMATION ABOUT FOREIGN TRADE STATISTICS

A discussion of the compilation procedures and coverage of the statistics appears in Reports FT 135, FT 410, and other statistical publications. Supplementary information and explanations of interest to users of foreign trade statistics (such as notices of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) are included as special announcements in current issues of the statistical publications.

Copies of foreign trade reports and tabulations are available for public reference use at Department of Commerce field offices and at some Bureau of Customs offices. A list of the Commerce field offices, indicating the specific reports or tabulations available for reference use at each office, is provided at the back of this publication. Additional information regarding the availability of foreign trade material may be obtained from the individual offices or from the Bureau of the Census, Washington, D.C. 20233. Foreign trade material is also available at the following reference locations:

Trade Information Branch  
Foreign Trade Division, Bureau of the Census  
Room 2555, Federal Office Building #3  
Washington, D.C. 20233  
(Located at Suitland, Md.)

Statistical Reference Room  
International Trade Analysis Division  
Bureau of International Commerce  
Room 3023, Commerce Building  
Washington, D.C. 20230

#### SPECIAL SERVICES

The Bureau of the Census provides a service whereby users of foreign trade statistics may obtain data prepared to meet their special needs on a cost-to-subscriber basis. This service provides a variety of information available in different arrangements and furnished in various forms. Copies of foreign trade machine tabu-

lations may be obtained in the form of microfilm, magnetic tapes, and photocopies of microfilm output. Portions of tabulations may also be obtained containing data in various arrangements, such as: data for specific commodities or commodity groupings, commodity by country or area, commodity by country by district, area or country by commodity, etc. In addition, it is frequently possible to obtain special reports containing data in greater detail than that included in regular reports and tabulations.

These services are available directly from the Bureau of the Census, Washington, D.C. 20233 or from the Clearinghouse for Federal Scientific and Technical Information, Springfield, Va., 22151. Copies of order blanks for use in subscribing to most of these special services are included at the back of this Guide. Information regarding the policy governing the preparation of special reports is provided in chapter VII. Additional information regarding special services may be obtained from the Bureau of the Census.

## IM 136 (Comparable Annual--IA 236, Part 1)

## U.S. IMPORTS FOR CONSUMPTION AND GENERAL IMPORTS

Continent by Country of Origin by TSUSA Schedule by TSUSA Number by Unit Control  
by Customs District and Method of Transportation

(Excludes Quantity Only Items)

(Z--Less than half the unit of measurement shown)

Month, year, country of origin code and description											
TSUSA number and commodity description	TSUSA unit of quantity	Unit control	Customs district code <sup>1</sup>	Imports for consumption (all MOT)		General imports					
				Net quantity  (TSUSA units)	Value  (dollars)	All methods of transportation		Vessel		Air	
						Net quantity (TSUSA units)	Value  (dollars)	Shipping weight (1,000 pounds)	Value  (dollars)	Shipping weight (1,000 pounds)	Value  (dollars)
Continent description				Totals 1,2	Totals 1-6	Totals 1,2	Totals 1-6	Totals 1-6	Totals 1-6		

## TOTALS:

1. Continent by country of origin by TSUSA schedule by TSUSA number by unit control by customs district
2. Continent by country of origin by TSUSA schedule by TSUSA number by unit control
3. Continent by country of origin by TSUSA schedule

4. Continent by country of origin
5. Continent
6. Global (grand total)

<sup>1</sup> District of entry for imports for consumption and general imports by all MOT; district of unloading for general imports by vessel and air.

## IM 145 (Comparable Annual--IA 245, Part 1)

## U.S. IMPORTS FOR CONSUMPTION AND GENERAL IMPORTS

## TSUSA Schedule by TSUSA Number by Unit Control by Country of Origin by Customs District by Rate Provision by Type by Economic Class and Method of Transportation

(Excludes Quantity Only Items)

TSUSA number, description, unit of quantity, part or subpart													Rate provision code	Type code	Economic class code	Month (01 - 12)					
Country code	Origin	Shipment -1; ( 1 )	Customs district of entry code	Customs district of unloading code	Country	Imports for consumption (all MOT)		General imports													
						Card count	Net quantity	Value	All methods of transportation		Vessel						Air				
									Subpart	(TSUSA units)	(dollars)	Net quantity (TSUSA units)					Value (dollars)	Shipping weight (pounds)	Value (dollars)	Shipping weight (pounds)	Value (dollars)

## TOTALS:

1. TSUSA schedule by TSUSA number by unit control by country of origin by customs district of entry by rate provision by type by economic class
2. TSUSA schedule by TSUSA number by unit control by country of origin by customs district of unloading by rate provision by type by economic class
3. TSUSA schedule by TSUSA number by unit control by country of origin
4. TSUSA schedule by TSUSA number by unit control
5. TSUSA subpart
6. TSUSA part
7. TSUSA schedule
8. Type (TSUSA schedule total)<sup>2</sup>
9. Global (grand) monthly total
10. Type (grand total)<sup>2</sup>
11. Economic class totals

<sup>1</sup>Code 2 indicates items imported under Tariff Provision 807.00. Code 3 indicates items imported under Tariff Provision 806.30.

<sup>2</sup>Monthly value totals by type for each TSUSA schedule are presented under the designation "TYPES" at the end of each schedule, as follows: First column-types 1, 5, & 6 (combined); second column-type 2; and third column-type 3. Totals in columns 5, 6, and 7 are for Census use only. Comparable data for all schedules combined are presented at the end of the tabulation.

## AE 350--PART 1

MONTHLY VESSEL ENTRANCES IN ALPHABETIC  
VESSEL NAME ARRANGEMENT

## EXPLANATION OF CODES:

Type Service

1. Liner or berth
4. Tanker
5. Irregular or tramp

Rig

1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, rowboat, research vessel

Ballast or Cargo

1. Vessel entered direct from foreign ports in ballast
2. Vessel entered direct from foreign ports with bulk cargo
3. Vessel entered direct from foreign ports with general cargo
4. Vessel entered via other domestic ports in ballast
5. Vessel entered via other domestic ports with bulk cargo
6. Vessel entered via other domestic ports with general cargo

Country and Subdivision or U.S. Port

Indicates first foreign country entering direct from (origin of inbound voyage) in terms of Schedule C code. Where "country from" has marked coastal differences a further distinguishing sub-country code is added-otherwise sub-country code is always "0". If entering via domestic ports, indicates last U.S. port vessel cleared in terms of Schedule D code.

Type Vessel

0. Vessels from other domestic ports, Navy operated vessels, vessels in for repairs or crew changes, and all other types excluded by reason of FT 975 coverage
1. All vessels except tanker entered direct from foreign ports
2. Tankers entered direct from foreign ports

Type Cargo

0. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

Trip

0. No foreign cargo discharged at this port
1. Foreign cargo discharged at this port
9. Vessels under 26 net registered tons

Month	Year	Day	Passengers	Army engineer channel	Customs district and port	Vessel manifest	Vessel name	Flag	Type service	Rig	Net registered tonnage	Ballast or cargo	Country and subdivision or U.S. port	Type vessel	Type cargo	Trip	Draft (feet)	O-Entrance code	Census use only	Month and serial number (Census use only)

## EM 594 (Comparable Annual--EA 694)

SHIPMENTS OF MERCHANDISE FROM THE UNITED STATES TO PUERTO RICO  
AND U.S. POSSESSIONS (VIRGIN ISLANDS AND AMERICAN SAMOA ONLY)Schedule B Section by Division by Group by Number by Country of Destination  
by Customs District of Exportation and Method of Transportation

(Effective March 21, 1970, and by notice appearing in the Federal Register (35 F.R. 4948) on that date, the Foreign Trade Statistics Regulations were amended to eliminate the requirement for filing with U.S. customs officials Shipper's Export Declarations on shipments to Guam, Wake Island, Midway Island, and Canton and Enderbury Islands. Accordingly the Bureau discontinued compiling data on shipments from the United States to these islands after February 1970.)

## AE 750 - PART 1

## MONTHLY VESSEL CLEARANCES IN ALPHABETIC VESSEL NAME ARRANGEMENT

## EXPLANATION OF CODES:

## Type Service

1. Liner or berth
4. Tanker
5. Irregular or tramp

## Rig

1. Motor dry cargo, steam dry cargo
2. Motor tanker, steam tanker
3. Tug
4. Barge (other than tanker), scow
5. Tanker barge
6. Other, including yacht, gas, sloop, schooner, sailboat, houseboat, rowboat, research vessel

## Ballast or Cargo

1. Vessel cleared direct to foreign ports in ballast
2. Vessel cleared direct to foreign ports with bulk cargo
3. Vessel cleared direct to foreign ports with general cargo
4. Vessel cleared via other domestic ports in ballast
5. Vessel cleared via other domestic ports with bulk cargo
6. Vessel cleared via other domestic ports with general cargo

## Country and Subdivision or U.S. Port

Indicates first foreign country clearing direct to (destination of outbound voyage) in terms of Schedule C code. Where "country to" has marked coastal differences a further distinguishing sub-country code is added-otherwise sub-country code is always "0". If clearing via domestic ports, indicates first U.S. port vessel entered in terms of Schedule D code.

## Type Vessel

0. Vessels to other domestic ports, Navy operated vessels, vessels in for repairs or crew changes, and all other types excluded by reason of FT 975 coverage
1. All vessels except tanker cleared direct to foreign ports
2. Tankers cleared direct to foreign ports

## Type Cargo

0. All vessels coded "0" under type vessel
1. Bulk or general cargo
3. Ballast

## Trip

0. No U.S. or in-transit export cargo laden at this port
1. U.S. or in-transit export cargo laden at this port
9. Vessels under 26 net registered tons

## Chapter V - Origin of Exports and Destination of Imports

The Census Bureau frequently receives inquiries regarding the possibility of obtaining information showing the place of origin for domestic merchandise exported from the United States and the place within the United States to which imported merchandise is destined. This information is not compiled as a part of the foreign trade statistics program since it is not required to be reported on import entries or export declarations, the basic sources from which the foreign trade data are compiled.

In recognition of the need for information on the origin of exported merchandise, the Census Bureau has conducted some special surveys to obtain such data. The results of the most recent survey were released in a report entitled Survey of the Origin of Exports by Manufacturing Establishments: 1969 (Current Industrial Reports, Series MA-161(69)-2). This report includes distributions of manufacturers' exports by regions, States, and metropolitan areas, and by Standard Industrial Classifications. This information was reported by manufacturers to the Census Bureau for products that the manufacturers knew were to be exported by the plant directly or through others with no additional manufacturing. Copies of this report may be obtained from the Bureau of the Census.

Some of the requests which have been received for information on the origin of exports have contained the suggestion that exporters be required to report such information on export declarations and that this information be compiled as a part of the regular foreign trade statistics program. After extensive consideration, the conclusion has been reached that the institution of a requirement for reporting such information on the export declaration does not provide a practical solution to the problem. The added reporting burden on exporters would be great. Also, the exporter or the person preparing the export declaration (frequently an agent acting on behalf of the exporter) may not have information about the place of origin of the merchandise. In addition, the added processing costs for tabulating place of origin information from the export declarations could be expected to be disproportionately high because of the large number of

individual observations to be sorted and summarized.

Investigations into the possibility of compiling place-of-origin information from export declarations have indicated that this type of data would be extremely difficult to obtain in some instances. Many commodities actually originate in different parts of the country. Automobiles, for instance, may be assembled in Michigan but the parts may have been manufactured or "originated" in almost every area of the United States. Therefore, the most that could be attempted without an impractical amount of detail would be to show where the automobiles were assembled into the form in which they are ready for export. This would also be true for many other commodities.

In some cases further difficulties would exist in determining the place at which the commodities were assembled into final form ready for export. An electric generator for installation on an automobile might be manufactured in Indiana and then shipped to Michigan for storage and for future sale as a replacement part. The generator eventually might be shipped from Michigan to Louisiana for export. While the generator could be defined as actually assembled ready for export in Indiana, the practical difficulties of determining this fact might be such that it would be necessary to credit Michigan as the place at which the generator was finally assembled ready for export. Similarly, pharmaceuticals may be made in many parts of the United States but packaged as shipments of mixed pharmaceuticals for export in New York. Because of the difficulties of obtaining information on where each part of a mixed shipment of pharmaceuticals was created or assembled in final form ready for export, it probably would be necessary to credit the whole shipment to the place of final packaging, in this case New York.

The examples given above provide some indication of the extent of the problems which would be involved in attempting to obtain information regarding origin of exports from the export declarations, and at the present time there are no plans for trying to obtain such information from this source.

## Chapter VI - List of Classification Schedules

To facilitate the compilation of the foreign trade statistics, various classification schedules are used for translating data such as commodity, country, district, etc. into numeric codes. The schedules contain lists of names or descriptions of the items with their assigned numeric codes. Following is a list of the classification schedules used in compiling and publishing the foreign trade statistics:

Schedule A - Statistical Classification of Commodities Imported Into the United States

Schedule B - Statistical Classification of Domestic and Foreign Commodities Exported From the United States

Schedule C - Classification of Country Designations for U.S. Foreign Trade Statistics

Schedule D - Classification of U.S. Customs Districts and Ports for U.S. Foreign Trade Statistics

Schedule P - Commodity Classification for Reporting Shipments From Puerto Rico to the United States

Schedule K - Classification of Foreign Ports by Geographic Trade Area and Country

Schedule R - Classification and Definitions of Foreign Trade Areas

Tariff Schedules of the United States Annotated

Copies of Schedule B and TSUSA may be obtained from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402. For information regarding other schedules, contact the Bureau of the Census.

## Chapter VII - Availability of Special Services

In addition to the sources of data described herein, the Census Bureau provides a special service whereby users of the statistics may obtain information at an earlier date than the release of published reports or may obtain data in greater detail or in different arrangement than that available in the statistics which are regularly released. The entire cost of the special work required to compile or duplicate the information from the basic data is charged to the subscriber. Special reports contracted for on a cost-to-subscriber basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. Additional subscribers may purchase any special reports listed in the publications.

The preparation of these reports on a cost basis is carried out in accordance with the Bureau of the Census "Policy Governing Special Services" set forth in current issues of the Bureau of the Census catalog. This reads in part as follows:

"It is the policy of the Department of Commerce and the Bureau of the Census to relieve the general public from bearing the cost of special services to private groups and individuals, who will be charged at cost for such services. It is also part of the program of the Bureau of the Census to furnish specialized service to other government agencies at cost.

"Special services, including compiling special tabulations, are furnished at cost, that is, the actual cost of the project to the Census Bureau, including the cost of planning for special work and the appropriate charges for overhead expenses. The cost of special services does not include the cost of collecting the data unless special questions have been added to the questionnaire at the buyer's request or an entire survey is undertaken for the sponsoring organization.

"There is a wide range in the costs for Census Bureau data made available to users, depending on the methods used and other factors.

"The cost of special services is determined on the basis of such factors as the quantity of data requested, the amount of work required to obtain the data, the complexity of data specifications requested by the user, processing costs for personnel and equipment, and the format (photocopies, punchcards, computer tapes, etc.) in which the data are made available to the users, as well as planning costs and appropriate charges for overhead expenses.

"A. Special tabulations or transcriptions of data.-- Special tabulations or transcriptions of data in the files of the Bureau of the Census will be undertaken on a cost basis, insofar as Bureau facilities are available. Those requesting special tabulations should understand that the data are based on surveys paid for by public funds and are therefore public property. The purpose for which such tabulations are obtained must not be contrary to the public interest nor be used to give unfair commercial or other advantage to any person or group.

"All unpublished data furnished by the Bureau will be accompanied, so far as feasible, by appropriate statements relative to the limitations of the data. When the condition of the data warrants it, the Bureau may specify that the material is for the information of the purchaser only and may not be published, or that any proposed publication of such material must be approved by the Bureau before publication.

"Special tabulations paid for by nongovernmental groups will be undertaken with the understanding that:

1. The material may be published subsequently by the Bureau and made generally available either without charge or at cost of publication, if the Bureau regards the material to be of general interest. If such action is taken within the time period provided in the agreement, or within 6 months if no time period is provided in the agreement, the Bureau will notify all purchasers of its decision to publish the tabulation.
2. If not published, it may be made available to other Government agencies or to appropriate nonprofit research groups without charge or at cost of duplication.
3. A request by other than a Government agency for a tabulation already prepared for another buyer will generally be handled in the following manner, if the information has not already been published by the Bureau:
  - a. If a job has not been completed, the costs will be appropriately divided and results will be furnished to both parties.
  - b. When, within the time period provided in the original agreement, information furnished to commercial groups or private individuals is requested by other commercial groups or individuals, the subsequent party or parties will be charged not less than the amount paid by the first party obtaining the information. Specified time periods will generally not exceed 18 months. If no time period is provided in the agreement, this provision will apply for 6 months from the date of delivery to the initial purchaser. If the cost to the Bureau for furnishing the information to the subsequent party is significantly less than that charged for the original information and the information is furnished within the agreed-upon time period referred to above, the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau and refunds made as necessary, provided that the amount for refund exceeds 10 percent of the cost of the original job, or \$25, whichever is larger. After the specified period, subsequent requests for the same tabulation will be filled at only the additional cost to the Bureau if any, and no refunds to prior purchasers will be considered.

- c. If, for any reason, the Bureau feels that the purchaser of a special tabulation is making unfair or improper use of the information furnished, it may take such action as is deemed appropriate to protect the public interest.

"In order to keep the public informed of special tabulations that have been furnished, the Bureau will list them, except for small projects, in this Catalog."

Certain specific points in regard to the application of these policies to the various types of foreign trade reports are described below:

- Type A. Advance reports containing final monthly figures not yet available in duplicated report form.

Advance reports present postings from machine tabulation sheets at the time the sheets are made publicly available. These sheets are made available several weeks prior to the date on which reports containing the information are distributed in duplicated form. Since the information in advance reports is already publicly available at the time the advance reports are released, the data have to all intents and purposes been published by the Bureau of the Census and the Census "Policy Governing Special Services" is therefore largely inapplicable. Anyone wishing the same type of report can obtain it only on paying the full price of the report, the price in all cases representing the actual clerical cost of posting information from the unduplicated machine tabulation sheets already made available for public reference.

- Type B. Reports presenting recombinations of information already published or already made available for public reference in the form of machine tabulation sheets.

These reports may be very simple and may, for example, merely represent recombinations of information from machine sheets available for public reference. For example, a report of this type may present information on how much of a particular commodity was exported from the United States through a particular customs district. This information is available for public reference in different form in copies of machine tabulation sheets showing exports in a commodity by country of destination by customs district arrangement. The report in this example would essentially consist of combining the figures of the movement to each country through the particular customs district into a total of the amounts shipped to all countries through that customs district.

Some Type B reports are considerably more complicated rearrangements of information already publicly available. For example, SM 705, presents data on waterborne exports

classified by U.S. port of lading, by foreign port of unloading, by commodity, and by country of destination. The subscriber to a report to be prepared on a cost basis may wish all of this information rearranged into commodity by U.S. port arrangement with no segregation by foreign port of unloading. Some such reports can be prepared by manually rearranging the information in the SM 705 in the form requested. In other cases it is substantially more efficient to retabulate the Bureau of the Census source material which was used to prepare the SM 705 into the form requested. The person requesting and paying for such a report pays for the cost of compiling the information either manually or by electronic equipment, whichever is more efficient.

The subscriber to Type B reports appears to be entitled to some assurance that other private organizations and individuals will not under ordinary circumstances obtain access to the information at the same time at no cost or at a substantially reduced cost. Therefore, Type B reports will ordinarily not be made available to the public without charge or at a substantially reduced cost until 6 months after the reports have been transmitted to the person or organization paying for them. However, the Bureau of the Census reserves the right to publish the data at an earlier date under circumstances such as those described in the extract from the Bureau's "Policy Governing Special Services" quoted above. In such cases the subscriber will be notified that public release is being made prior to the expiration of the 6-month interval. The subscriber will not specifically be notified of any release at the end of the 6-month interval. Public release by the Bureau prior to the expiration of the 6-month interval will not normally occur where the subscriber obtained, and is using, the information for purposes of market research or to determine his own competitive position in the market for a particular product or service.

Where the Bureau receives requests from private organizations or individuals for the information in Type B reports before the expiration of the 6-month or other interval described above, a policy will be followed of requesting the inquirer to pay the same amount as the person who originally subscribed to the report.

If the cost to the Bureau for furnishing the information to the subsequent party (parties) is significantly less than that charged for the original information, the total cost will be prorated among the various parties in an equitable manner as determined by the Bureau and refunds made as necessary, provided that the amount for refund exceeds 10 percent of the cost of the original job, or \$25, whichever is larger.

Although information in such reports is being made available on request to Government agencies for their own use during the period the report is not to be released, such agencies are not permitted to release the information publicly without permission having been first obtained from the Bureau. Such permission is granted only under circumstances falling within the Bureau policy quoted above.

Type C. Reports which present information not publicly available in any form.

Included are reports showing separate statistics on exports or imports of individual products included, without segregation, in a Schedule B or a TSUSA commodity classification regularly shown in the published statistics, and other information not available in published reports or in machine tabulations available for public reference. Information in Type C reports can, therefore, only be obtained from information on punchcards, electronic computer tape, Shipper's Export Declarations, or import entry forms not publicly available.

The policy followed in making Type C reports publicly available is similar to the policy followed by Type B, described above. Since in contrast to Type B, Type C reports represent newly-compiled information not otherwise publicly available, there is a greater likelihood that the Bureau may find it necessary to release the information in

Type C reports at a date earlier than 6 months after transmittal to the subscriber.

### Preliminary Investigations

In addition to the actual work involved in preparing Type B and Type C reports, there are, in some cases, considerable amounts of work required in preliminary investigations of basic records even before estimates of the cost of preparing the reports can be made. These preliminary investigations of basic records, depending on the information to be obtained for the report, include such determinations as the following:

1. Whether the desired information is available.
2. Whether the release of desired information would tend to reveal the transactions of individual firms, in which case the information would not be released.
3. The best procedure under which the information would be obtained. This determination would include the comparison of costs under alternate procedures and the selection of the procedure with the lowest cost.

Preliminary investigations along the lines outlined above are not required for all reports. However, if a preliminary investigation is required before the cost of some reports can be estimated, persons requesting such reports will be charged the cost of the investigation. Wherever it is necessary to make a charge for preliminary investigation, the charge will usually be \$125.

Request for additional information in regard to the preparation and release of foreign trade special reports prepared on a cost basis should be addressed to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

# REPORTS ORDER FORM

## MICROFILM, MAGNETIC TAPES, AND PHOTOCOPIES

### 1971 UNPUBLISHED FOREIGN TRADE DATA

The Bureau of the Census, in conjunction with the National Technical Information Service in the Department of Commerce, is making a variety of detailed statistical data available on a subscription basis. These data are available in the form of microfilm and/or photocopies of microfilm output. They represent complete copies of the most detailed reports prepared for public reference, which normally are available only at a limited number of reference points in the United States. Extracts of portions of reports are also available in the form of photocopies.

In addition, monthly data are made available for transcription onto magnetic tapes from Bureau of the Census data files. The information is in numeric format only. The quantitative data appearing in the tapes conform to the **detail** items shown in the exhibits of the **Guide** for the reports listed. Data are copied onto 2400 ft. length, .5 inch width, 7 channel magnetic tape in binary coded decimal even parity at 556 characters per inch density - 720 characters per block, and .75 inch interblock space.

A list and description of the reports available for 1971 data under this service, together with monthly and annual subscription costs, are shown on pages 3 and 4. Costs for extracts of individual reports may be obtained by writing the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233.

If you wish to subscribe to any of the reports listed, please complete the enclosed order form and return with your check or money order to the Bureau of the Census or National Technical Information Service, as appropriate. Subscriptions cover January - December 1971 statistics only.

Additional order forms for subscriptions to reports listed on pages 5 and 7 may be obtained by writing either the Bureau of the Census, Washington, D.C. 20233, or the U.S. Department of Commerce, National Technical Information Service, Springfield, Va. 22151, as applicable.

## *Notice to Users of Census Computer Tape Copies*

The Bureau of the Census has taken all reasonable precautions to insure that information recorded on the magnetic tape you purchase will be readable on your equipment. When filling customer orders only new tapes are used or tapes furnished by the customer. The Bureau tapes are purchased from manufacturers on the General Services Administration's approved list of suppliers. The tapes have been subject to demanding quality control procedures during manufacture and prior to acceptance by the Government.

Tape units on the UNIVAC 1107/1108 computers on which the customer tapes may be prepared are calibrated periodically by Census engineers. The calibration tape used is the IBM Master Skew Tape 8-4-090389. Customer copies may also be made on an IBM System 360, Model 40 computer. The tape drives on this system are regularly serviced by the manufacturer's technicians. All systems are periodically subjected to compatibility cross-checks.

Packaging procedures when preparing tapes for shipment are those generally recommended by suppliers. The tape is secured with a stopper, placed on its plastic container, then packed in a corrugated box.

If you encounter problems in reading the tapes you receive, we suggest that you request calibration tests on your own tape units before you communicate with us. When you are assured that you have received a defective recording from us, please document the problem as thoroughly as possible and return the defective tape and problem documentation to:

Chief, Tape Management Branch  
Processing Division  
Bureau of the Census  
Washington, D.C. 20233

Tapes furnished by the subscriber should also be sent to the foregoing address.

## PUBLICATIONS ORDER FORM

## 1971 MONTHLY IMPORT DATA

U.S. IMPORTS FOR CONSUMPTION AND GENERAL IMPORTS: TSUSA Schedule,  
TSUSA Number, Unit Control, Country, Customs District, Rate Provision,  
Type, Economic Class, and Method of Transportation

Date received	Date completed	Project No.	Report No. IM-145
---------------	----------------	-------------	----------------------

## DESCRIPTION

The 1971 monthly import data in terms of individual Tariff Schedules of the United States Annotated (TSUSA) commodities are available to interested parties. The statistics are reproduced from microfilm and are arranged in TSUSA item by unit control by country of origin, by district of entry, by district of unloading, by rate provision, by type of transaction sequence. Separate totals are shown for shipments moving by vessel, by air, and by all methods of transportation combined. The yearly subscription will cover a 12-month period beginning with the next issue after receipt of a paid order. Prices for back issues will be quoted upon request.

## HOW TO ORDER

Please indicate the commodity data that you wish to receive. The price for each TSUSA schedule (or part, where indicated) is for the yearly subscription period. Add 25% additional to each subscription for foreign mailing.

Fill in the information requested below. Return this order with a check or money order, in the total amount for all items requested, to the U.S. Department of Commerce, National Technical Information Service, Springfield, Virginia 22151.

DISTRIBUTED BY: U.S. Department of Commerce, National Technical Information Service

## 1971 MONTHLY IMPORT DATA

U.S. GENERAL IMPORTS: Schedule A Commodity Groupings,  
World Area, Country, and Method of Transportation

Date received	Date completed	Project No.	Report No.  IM 150/155
---------------	----------------	-------------	------------------------------

## DESCRIPTION

The 1971 monthly and cumulative year-to-date import data, in terms of Schedule A commodity groupings, world area, country, and method of transportation (all methods combined with separate totals for vessel and air), are available to interested parties. The statistics are reproduced from microfilm and are arranged in the following order: Schedule A commodity groupings; Schedule A subgroup by world area; Schedule A subgroup by country; world area by Schedule A subgroup, and country by Schedule A commodity groupings. A separate table, which presents information about the number of sample shipments, is included. The yearly subscription will cover a 12-month period beginning with the next issue after receipt of a paid order. Prices for back issues will be quoted upon request.

## HOW TO ORDER

Please indicate the tables you wish to receive. The price for each table(s) is for the yearly subscription period. Add 25% additional to each subscription for foreign mailing.

Fill in the information requested below. Return this order with a check or money order, in the total amount for all items requested, to the U.S. Department of Commerce, National Technical Information Service, Springfield, Virginia 22151.

## PUBLICATIONS ORDER FORM

## 1971 MONTHLY EXPORT DATA

U.S. EXPORTS: Schedule B Section, Division, Group, Number, Country of Destination,  
Customs District of Exportation, and Method of Transportation

Date received	Date completed	Project No.	Report No. <b>EM-522</b>
---------------	----------------	-------------	-----------------------------

## DESCRIPTION

The 1971 monthly export data in terms of individual Schedule B commodities are available to interested parties. The statistics are reproduced from microfilm and are arranged in Schedule B commodity by country of destination, by U.S. customs district of exportation sequence. Separate totals are shown for shipments moving by vessel, air, and by all methods of transportation combined. The yearly subscription will cover a 12-month period beginning with the next issue after receipt of a paid order. Prices for back issues will be quoted upon request.

## HOW TO ORDER

Please indicate the commodity data that you wish to receive. The price for each Schedule B section, division (or group where indicated) is for the yearly subscription period. Add 25% additional to each subscription for foreign mailing.

Fill in the information requested below. Return this order with a check or money order, in the total amount for all items requested, to the U.S. Department of Commerce, National Technical Information Service, Springfield, Virginia 22151.

DISTRIBUTED BY: U.S. Department of Commerce, National Technical Information Service
